### National Status

|                            |  |
|----------------------------|--|
| <b>Status and Criteria</b> | <b>Least Concern</b>                   |
| <b>Assessment Date</b>     | 2005/06/30                             |
| <b>Assessor(s)</b>         | W. Foden & L. Potter                   |
| <b>Justification</b>       | This taxon was not selected in any one |

of four screening processes for highlighting potential taxa of conservation concern for detailed assessment and was hence given an automated status of Least Concern. The Threatened Species Programme is currently systematically completing full assessments for all taxa with an automated status. If you disagree with this taxon's status, please contact the Threatened Species Programme at the link below.
