### Taxonomy

Scientific Name	<b>Conophytum bilobum (Marloth) N.E.Br. subsp. <i>bilobum</i></b>
Higher Classification	Dicotyledons
Family	AIZOACEAE

### National Status

Status and Criteria	Least Concern
Assessment Date	2016/06/02
Assessor(s)	A.J. Young & L. von Staden
Justification	This taxon is widespread (EOO 28 107 km <sup>2</sup> ), common, and not in danger of extinction.

### Distribution

Endemism	South African endemic
Provincial distribution	Northern Cape, Western Cape
Range	Northern Richtersveld to Garies.

### Habitat and Ecology

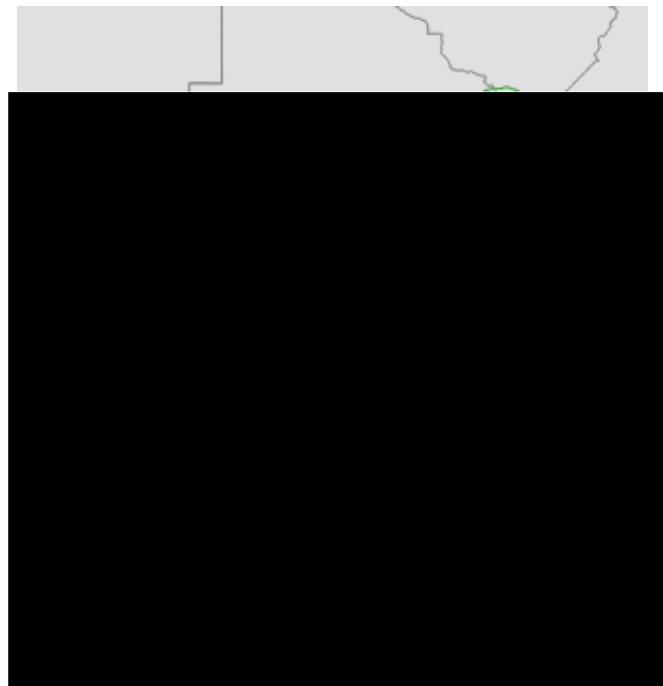

Major system	Terrestrial
Major habitats	Desert, Succulent Karoo
Description	Rocky slopes and ridges, primarily quartzite.

### Threats

There are no known severe threats that are likely to lead to this taxon's extinction.

### Population

This taxon is very widespread and variable in form. There are more than 100 subpopulations, with local abundance ranging from, typically,
